A	The diagram shows a Raspberry Pi connected to a 2-wire CAN module. The module has two pins labeled 'H' and 'L' under the 'CAN' header. The 'H' pin is connected to a line labeled 'CAN_H' which leads to a terminal labeled '2-C12'. The 'L' pin is connected to a line labeled 'CAN_L' which leads to a terminal labeled '2-C13'. There is also an empty rectangular box to the right of the CAN module.
